Key Projects

- Workflow Management System** Jan 2023 - June 2022
(M.C.A / Guide: Bijoy M B, Joint Director) C-DAC Bangalore
 - A major project done during the Internship period at C-DAC, Bangalore. Here, a user makes a request for approval, and the request has to follow each of the available steps for final approval. It is managed and handled (accepted or rejected) in each step by a particular user as a handler and has functionality to track the request in real time.
 - Keywords:** HTML, CSS, Tailwind CSS, JS, PHP, MySQL, JWT, REST API, WordPress, git, GitHub
- Student Mentoring System** Aug 2022 - Dec 2022
(M.C.A / Guide: Prof. Sarat Saharia, Professor & HOD) Tezpur Univeristy
 - A full stack minor project on student mentoring systems where a mentor is responsible for mentoring one or a group of students. Mentors can monitor students' activities, overall performance, and results and have functionality like creating group meetings, giving remarks to a student, etc.
 - Keywords:** HTML, CSS, Bootstrap, JS, PHP, MySQL, git, GitHub
- An Alumni Records-Keeping System** Feb 2021 - June 2021
(B. Sc. / Guide: Prof. Pratul Kalita) Pub Kamrup College
 - A full-stack web development project as a major project for the course where the project provides the functionality to store and manage alumni records easily and efficiently for an institution.
 - Keywords:** HTML, CSS, Tailwind CSS, JS, PHP, MySQL
- A website for an education center** April 2021 - June 2021
(B. Sc.) Pub Kamrup College
 - I have designed a static website for an education center using HTML, CSS, JavaScript, Bootstrap, and Google Forms, and the website is hosted on a GitHub page. Link: <https://slsofficial.github.io/home/>
 - Keywords:** HTML, CSS, Bootstrap, JS
